

LUO YUNJIE

9 Boulevard des Maréchaux, 91120 Palaiseau, France
yunjie.luo@polytechnique.edu

EDUCATION

École Polytechnique (X) Engineering Program (Cycle ingénieur polytechnicien) Research Interests: Number Theory and Combinatorics GPA: 3.84/4.0 (First year) 3.85/4.3 (Second year)	September 2024 - Present
University of Science and Technology of China (USTC) Bachelor of Science in Mathematics Member of China-France Mathematics Talents Class President of the Cinema Club GPA: 3.76/4.3 Rank: 6/21	September 2021 - June 2024

EXPERIENCE

Central Library of École Polytechnique <i>Library Assistant</i> - Assisted patrons with locating resources and utilizing library services and systems. - Supported daily library operations, including user registration and maintaining a quiet study environment.	January 2025 - Present Palaiseau, France
Baidu Technology Park <i>Data Annotation and Analysis (Mathematics)</i> - Annotated mathematical data for training and evaluating LLMs on mathematical reasoning tasks, including question generation and problem solving. - Developed benchmarks for mathematical disciplines.	June 2026 - August 2026 Beijing, China
École Polytechnique <i>Tutor for Algebra</i> - Assisted undergraduate students in understanding fundamental algebraic concepts and problem-solving techniques. - Provided individualized assistance with course material and problem sets.	February 2026 - June 2026 Palaiseau, France
University of Science and Technology of China <i>Teaching Assistant in Mathematics and Physics</i> - Served as TA for Abstract Algebra (Spring 2024) and Electrodynamics (Fall 2023). - Graded assignments and exam papers, led weekly problem-solving sessions.	November 2023 - June 2024 Hefei, China

PROJECTS

Adelic Proof of Hecke L-Function Functional Equation <i>Academic Project (Group Work)</i> - Studied and reconstructed the adelic proof of the functional equation for Hecke L-functions in Tate's thesis under the supervision of Professor David T.-B. G. Lilienfeldt. - Co-authored a 49-page collaborative report in $\text{\LaTeX}$.	September 2025 - May 2026 Palaiseau, France
---	--

Historical Survey of Gross–Zagier Formula
Course Project (Independent Study)

Spring 2026
Palaiseau, France

- Wrote a [historical survey](#) covering the development from congruent numbers, elliptic curves, and modular forms to the Gross–Zagier theorem (1986) and its modern generalizations.

PACE (PKU Algebraic Combinatorics Experience)
Research Student

July 2025 - August 2025
Beijing, China

- Conducted an 8-week research project in algebraic combinatorics at BICMR, Peking University, under the guidance of Professor [Kyle Gannon](#).
- Investigated the enumeration of finite distance monoids via Archimedean class decompositions, deriving exact formulas for several classes of finite distance monoids.
- Co-authored a research paper titled “Enumeration of Finite Distance Monoids” ([arXiv:2512.07499](#)), with Jie Sheng.

SERVICE & OUTREACH

EGMO (European Girls’ Mathematical Olympiad)
Volunteer

April 2026
Bordeaux, France

- Guided and assisted the participants during the competition.

HONOURS & AWARDS

- **Fulgence Bienvenüe International Scholarship** (2024–2027), École Polytechnique
- **Outstanding Undergraduate Thesis Award** (2024), USTC – top 2% of theses
- **Yang Yuanqing Foundation Scholarship** (2023), USTC – recognizing excellence in academic research
- **NIO Scholarship** (2023), USTC – top 10% students
- **China-France Mathematics Talents Class Scholarship** (Second Prize 2023, Third Prize 2022), USTC
- **Outstanding Student Scholarship** (Silver Award 2022), USTC
- **Freshman Scholarship** (Bronze Award 2021), USTC

SKILLS

Programming Languages & Tools	Java, $\LaTeX$
Languages	Chinese (native), English (upper-intermediate), French (upper-intermediate)

INTERESTS

Cinema	Bridge game	Badminton
